Summary

Front-end developer with nearly 2 years of experience. I have contributed to creating and developing innovative products for a startup, transforming ideas into functional web solutions, enabling the company to establish its own products. Passionate about developing my skills and transforming designs into interactive, fast and fully responsive websites. I have worked on developing responsive websites and projects such as e-commerce platforms and ERP systems. Always striving to improve my performance and keep up with the latest technologies in the field of front-end development.

Work Experience

Safety-Code

Front-end developer

OCTOBER 2023 - Present

- Started by learning Figma, then converting designs to functional code using Laravel, jQuery, Bootstrap, and Sass, ensuring responsiveness across all screens.
- I did a range of projects from scratch.
- Developed major projects like E-commerce and Erp System.

PROJECTS (with company)

- ### E-commerce

  Built an e-commerce website interface from scratch using Figma, Html, Sass and Jquery, based on improving user experience and performance, and a responsive design that fits different devices.

- ### Programming Company Website

  Building a website for the company I work for from scratch, using Figma, Html, Sass and Jquery, the site offers various services such as custom software development, application design, and a responsive design that fits different devices.

- ### ERP System

  Developed an ERP System to be fully responsive to all screens, the Application was built using Html, Css, PHP Laravel, Jquery.

- ### Anas Store

  Developed An existing e-commerce website on the internet for medical instruments, the appearance has been changed to be more attractive and responsive to all screens, the Application was built using Html, Css, PHP Laravel, Jquery.

Self Experience

Besides my work, I started learning React.js, Next.js, TypeScript, and other relevant tools in April 2024 to keep up with the job market and the latest technologies. I am passionate about improving my skills and leveraging modern tools to build impactful and innovative projects.

PROJECTS (individually with react)

- ### E-commerce
  Build an e-commerce website with login and register to learn React in depth and be able to use it in big projects, using React Js, Redux Toolkit, React Router Dom, Axios, and Formik.

- ### LinkedIn Clone
  Developed a LinkedIn-like platform featuring user authentication, and post creation to simulate a professional social network. Utilized **React.js**, **Redux Toolkit**, **React Router DOM**, and **Firebase** for backend integration. The project enhanced my skills in building scalable, interactive applications and leveraging Firebase for real-time updates and secure data handling.

- ### CRUD Application
  Built a CRUD application with functionalities for creating, reading, updating, and deleting data, using React Js, Redux Toolkit, React Router Dom, Axios, and Formik.

- ### Cashier Page
  Create a cashier page with two sections, one for products and their measurements, if any, and one for calculating the quantity, discount and total for each row, using React Js and Redux Toolkit.

Skills

React.js, Next.js, Laravel, jQuery, **Typescript, Figma, Redux Toolkit, Axios, JavaScript & ES6, Firebase, Html, Css, SASS, Bootstrap, Tailwind, OOP and Git.**

EDUCATION

- Bachelor's Degree in Arabic Language (Currently on hold).
- Faculty of Arabic Language, Al-Azhar University – Gerga, Egypt.
- Expected year of resumption: 2028.
